Quezon City, Philippines

PROFESSIONAL SUMMARY

BS Computer Science graduate specializing in Data Science with hands-on experience building full-stack web applications using Laravel, Vue.js, Next.js, and PostgreSQL. Experienced in developing production features, optimizing application performance, and collaborating with cross-functional teams.

EDUCATION

Lyceum of the Philippines University - Batangas 2021 - 2026
Bachelor of Science in Computer Science Specialized in Data Science

- **Organizations:** LPU-B Microsoft Student Community (2021 - Present)
- **Relevant Coursework:** DSA, OOP, Software Engineering, Data Science, AI

EXPERIENCE

Junior Web Developer Intern March 2026 - August 2026
Circuit Solutions Inc.

- Designed UI wireframes in Figma based on client requirements while collaborating with senior developers and participating in client meetings to gather business requirements.
- Developed responsive front-end components using **Vue.js, Vuetify, Pinia, and Vue Router** while integrating **RESTful Laravel APIs** into the application.
- Worked in a team environment, following development workflows and version control practices
- Reduced repeated image load times by **~99%**, from **300–500ms** down to under **2ms**, by implementing **client-side caching** of S3-signed image URLs and property listing data using **Pinia** state management
- Enabled accurate property location pinpointing for real estate agents by implementing reverse geocoding via the Nominatim API to parse Google Maps share links into latitude/longitude coordinates, integrated into the admin property detail workflow
- Delivered end-to-end CRUD functionality across **10+ modules** (properties, brokers, calendar events, activity logs) using Vue.js, Axios, and Laravel REST APIs.
- Automated One Pager, Two Pager, and Property Information Sheet (PIS) generation through dynamic **HTML-to-PDF integration** with backend services.
- Built and maintained **15+ responsive admin and guest-facing pages**—including debounced search, bulk XLSX exports, and map integrations—using Vue.js, Vuetify 4, and Vue Router.

PROJECTS

WikaWonders Kids | Next.js, TypeScript, Supabase (PostgreSQL), TailwindCSS, Vercel, Python

- Built and deployed a full-stack gamified Filipino language learning platform serving **161 users** (45 teacher/parent accounts and 116 students) across **16 classrooms**, by architecting a Next.js application with Supabase, PostgreSQL, and role-based dashboards for administrators, teachers, parents, and students.
- Enabled teachers to manage **764 assignments** across **93 classroom enrollments** by developing end-to-end classroom management features, RESTful APIs, and PostgreSQL database workflows.
- Secured authentication for **100+ users** by implementing role-based access control, Google OAuth, OTP verification, TOTP-based two-factor authentication, and session management using Supabase Auth.
- Delivered personalized learning insights by developing a Python-based **K-Means clustering** pipeline that groups learners into proficiency levels and exposes analytics through dedicated API endpoints for teacher dashboards.
- Integrated **36+ Godot WebAssembly** educational games into the platform by developing reusable routing and embedding workflows, enabling seamless access to interactive learning activities within the web application.
- Improved production readiness by identifying and resolving dependency vulnerabilities, strengthening type safety, and optimizing application performance prior to deployment on Vercel.

PERSONAL PORTFOLIO | Next.js, TypeScript, TailwindCSS, Vercel | <https://zymer-fernando.vercel.app/>

ACHIEVEMENTS

- 3rd Place: LPU-B Technovation 10-12-2024, Programming Competition.
- 6th Place: DataBiz Conference 2024, Programming Competition.

- Finalist in CODE (Competition of Outstanding Creativity and Exploration) INTERNATIONAL 2024 held by Brawijaya University in Indonesia.

CERTIFICATES

- Generative AI: Introductions and Applications – IBM
- Data Visualization with Python – IBM
- Introduction to HTML, CSS, JavaScript – IBM
- Introduction to Software Engineering – IBM
- Microsoft Excel Associate – Microsoft

TECHNICAL SKILLS

Languages: HTML5, CSS, JavaScript, TypeScript, Python, C++, PHP, Java, SQL

Developer Tools: Postman, Github, Supabase, Figma, Vercel, VSCode, Cursor, Claude Code, PostgreSQL, npm, Bitbucket, AWS S3, AWS EC2, Docker, Wordpress, Shopify, n8n

Frameworks: Next.js, ReactJS, Node.js, Vue.js, Laravel

Libraries: NumPy, pandas, scikit-learn, TailwindCSS, shadcn/ui, Express, FastAPI

Other: Agile, REST APIs, Jira, Trello
